| 13 Switching profiles      | 14 FAQ                   |

## 1 Create an account

No app store needed to begin — start straight from a web link.

- 1 On your phone's browser (Safari / Chrome), go to **app.jarami.app**
- 2 Tap **Create your free account** — sign up with email, or **Sign in with Google**
- 3 Name your family and you're in. Free to start, no card needed.

Jarami comes from the Korean word **jarada (to grow)** — small daily habits add up to your child's growth.

---

## 2 Install it like an app

Add it to your home screen and it opens full-screen, just like a real app.

- **iPhone (Safari):** tap  → 
- **Android (Chrome):** tap  → 

On Android you can also download the installable app (APK) at [jarami.app/download](https://jarami.app/download).

---

## 3 Set the Parent PIN

A parent PIN keeps children out of the grown-up settings.

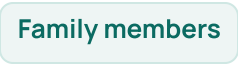

- 1 Top-right of the home screen, tap the **gear ⚙ (Settings)**
- 2 The starting PIN is **1234** — **please change it.**
- 3 Set your own PIN; you'll enter it whenever you open Settings or Parent mode.

**Important:** if you leave the default PIN **1234**, your child could get in. Be sure to change it!

---

## 4 Add a child

- 1 ⚙ **Settings** → the  section
- 2 Tap 
- 3 Tap  to set their name, avatar and colour.

---

## 5 Kid login code (kid PIN)

A code your child types to open their own space. Optional — you can skip it.

- 1 ⚙ **Settings** → the child's **Edit**
- 2 Type a number into **Kid login code (optional)** (e.g. 1004)
- 3 Once saved, they enter this code when tapping their face on the home screen.

Leave it blank and they **tap straight in** — easiest for little ones. A code gives older kids that "my own space" feeling.

---

## 6 Build routines & tasks

- 1 ⚙ **Settings** → child's **Edit** → the routines list (Morning, Afternoon...)
- 2 Set each task's **name** , **picture** , **skill** and **points**
- 3 Use **Add task** for a task, **Add routine** for a new group

There are **Routine modes** for Travel or Holiday — routines change for that time, and the streak is protected.

---

## 7 Child checks → parent approves

Your child ticks tasks off; you approve the ones actually done.

- 1 The child **taps to tick** tasks in their own screen
- 2 You tap **Parent** at the top → enter PIN → **Parent mode**
- 3 Tap **Approve** on completed tasks and points add up

**Tip:** you don't have to approve all day. Do it **once in the evening**, going through the checklist together at dinner — less nagging, more connection.

---

## 8 Picture mode (for young children)

For kids who can't read yet — big pictures, big buttons, and tap-to-hear.

- 1 ⚙ **Settings** → child's **Edit** → turn on **Picture mode (for young children)**
- 2 Each task shows a large **hand-drawn icon**
- 3 Tapping a task **reads it aloud** (a recorded voice, or the built-in voice)

---

## 9 Record voices

Record tasks in Mum or Dad's voice — or let your child record themselves.

- 1 ⚙ **Settings** → child's **Edit** → under a task,  **Record voice**
- 2 **Allow** the microphone and speak — it saves automatically
- 3 In picture mode, tapping that task plays the **recorded voice**

## 10 Rewards · coins · screen time

- Good habits earn **points and coins**
- The **Store** turns coins into rewards (you set them)
- ⚙️ **Settings** → child's **Screen time tiers** — **you** decide how weekly points become screen time

Screen time is **earned** — and exactly how much is entirely your call.

## 11 Stickers · Think & Talk

- **Stickers:** child's **More** → **Sticker book** → (Parent mode) give a sticker with a little note. They collect them with pride.
- **Think & Talk:** the card on **Today** screen — they answer **out**, and **listen** when you have the child's gentle prompts **loud** you **later** a moment.

## 12 Grown-ups grow too

Jarami is for the whole family — parents included.

1

⚙️ **Settings** → **Family members** → **Add a grown-up**

2

Add your own habits (exercise, reading, water...) for your own growth journey

3

In that profile, one tap completes a habit — and your kids see you growing too

A grown-up's **Home & Admin** also holds **home chores and bills**.

## 13 Switching profiles · more children

- On "Who's checking in today?" , tap a face to enter that child's space
- Tap ← (back) to leave; tap another face to switch
- Add as many children as you like with [Add child](#)

## 14 Frequently asked questions

### I forgot the Parent PIN

The default is **1234**. If you changed it and forgot, email [hello@jarami.app](mailto:hello@jarami.app).

### Does it work offline?

Yes — **everything you've seen stays** offline, and it syncs automatically when you're back online.

### Will the same info show on other devices?

Yes. Log in with the same account and it looks the same on any phone or tablet.

### The app won't install on Android

On Samsung, turn off **Settings → Security → Auto Blocker**, then download again with **Chrome** from [jarami.app/download](https://jarami.app/download).

### My child ticked a task but points didn't go up

A parent must tap [Approve](#) in [Parent](#) mode for points to count. (Doing it together in the evening works nicely.)

### How do I turn on picture mode?

⚙ **Settings** → child's [Edit](#) → turn on [Picture mode](#) .

## **Still have a question?**

Ask us anytime — we're happy to walk you through it.
